

SupTech Week 2025

Scaling Solutions for Greater Financial System Efficiency and Resilience

CAMBRIDGE SUPTECH LAB

Background

SupTech Week is an annual gathering of financial supervisors, industry leaders, and innovators, hosted by the University of Cambridge SupTech Lab in collaboration with the World Economic Forum. This hybrid event provides a unique platform for sharing cutting-edge ideas, research, solutions and insights to drive the digital transformation of financial supervision.

Throughout SupTech Week, experts in supervisory technology and digital transformation convene to discuss, collaborate, and accelerate innovation in both suptech and regtech. The event fosters dialogue and partnership among a diverse group of stakeholders, including financial authorities, service providers, technology vendors, research institutions, and other key ecosystem players. Participants explore new trends in digital transformation related to supervisory technology and share lessons, challenges, and opportunities from around the world. By facilitating knowledge exchange and multi-stakeholder collaboration, SupTech Week supports the development and scaling of innovative suptech solutions that ultimately strengthen the global financial system.

Hybrid Experience

This event will be held in a hybrid format, featuring virtual sessions alongside high-level, in-person engagements in New York. Online attendees will have the chance to attend live-streamed panel discussions, and curated interactive sessions. The Digital Transformation Solutions' GovSpace platform will be leveraged throughout the week to access dynamic activities, content, and practical tools.

Contact Information

For additional questions, please reach out to the University of Cambridge SupTech Lab at suptechweek@jbs.cam.ac.uk or Whitney Wellington, Lead, Regulatory and Supervisory Technology at whitney.wellington@weforum.org. Further information on this event can be found on the [Cambridge SupTech Lab webpage](#).

2025 Theme

Scaling Solutions for Greater Financial System Efficiency and Resilience

SupTech Week 2025 will highlight the journey from early-stage suptech projects to sustainable, scaled solutions. Through engaging discussions, interactive workshops, and global showcases, the event will explore three cross-cutting areas:

Scaling Solutions: SupTech Week 2025 will focus on expanding suptech projects into institution-wide efforts, cross-jurisdictional cooperation, and other govtech verticals.

Driving Impact: The event will spotlight suptech efforts that are advancing more inclusive, sustainable, and accountable economies. Sessions will also address how digital transformation can be extended to areas with fewer resources, ensuring broader and more equitable progress.

Celebrating Innovation: SupTech Week 2025 will showcase the latest prototypes, live deployments, and research breakthroughs that are shaping the future of financial supervision.
